

WHAT IS DROPSTREAM?

DropStream is an eCommerce fulfillment integration platform that allows 3PLs and other fulfillment providers to easily connect their warehouse management system to the online shopping carts used by their customers.

INTEGRATIONS MADE SIMPLE

Warehouse staff can easily login and create integrations for customers through the DropStream interface. Track orders and monitor integrations via the easy-to-use dashboard.

KEY FEATURES

- **Automatic Order Import**
Every 15 minutes, orders are automatically imported directly to your WMS.
- **Automatic Shipping and Tracking Sync**
When packages are shipped, tracking numbers are automatically sent to the online shopping cart. This also closes the order and notifies the shopper that their package is on the way.
- **Automatic Inventory Sync**
Every 60 minutes, inventory sync automatically updates the shopping cart with inventory levels from the fulfillment warehouse.

BENEFITS FOR 3PLS

- Avoid the cost and hassle of building and maintaining your own integrations
- Replace redundant and error prone manual processes with automated order fulfillment workflows
- Save time at the fulfillment warehouse by simplifying your order fulfillment process
- Win new customers by offering a suite of pre-built eCommerce integrations

Scott Madsen, National Imports LLC

"DropStream is a useful capability that gives us greater flexibility in meeting our fulfillment requirements. The service was easy to set up and has been very reliable."
